

ENASYS Professional™

Full Asset Tracking System for High-Value IT and Critical Assets

Professional Asset System Includes:

- EnaSys Professional™ Software
- Handheld RFID Reader and Barcode Scanner*
- Charger and Adapter Set
- Quick-Start Guide
- 100 Assorted RFID Tags/Barcode Labels
- License Supporting up to 10,000 Assets**
- 7-inch (or Larger) Tablet

Scalable, Hybrid Solution - BOTH RFID and Barcode

EnaSys Professional is designed for companies seeking RFID/barcode solutions that can track computers, servers, and other IT equipment accurately. Complete periodic inventories/audits of other high-value items and know where all your assets are in 1/10th of the time.

*Completed and passed various drop, tumble, and seal tests

**Additional assets, computers, and maintenance available

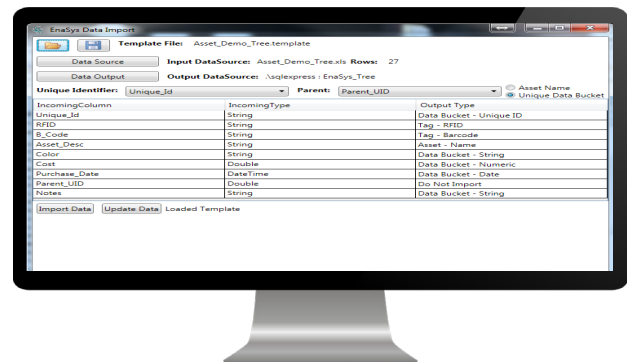

Purchase with Maintenance to Receive Upgrade Packages and Road Map Notifications - including Check-In/Check-Out Functionality* FREE

Companies can implement a full production solution and an enterprise-wide asset-tracking project.

The system includes a high-performance, wireless Bluetooth reader, able to communicate with a variety of host devices. It is designed for regular data logging of sensitive equipment.

Among its many benefits, EnaSys Professional will help you to:

- Increase accountability and security
- Meet audit and compliance requirements
- Minimize insurance costs and taxes
- Improve productivity - 10x speed over manual
- Eliminate need for expensive equipment
- Simplify data synchronization

- NO CHARGE UPGRADE to full check-in/check-out capability

*See Upgrades on page 2

ENASYS Professional SPECS

Use the extremely powerful import tool to quickly and easily upload Excel data spreadsheets into customizable templates for tailored inventory and audit processes.

Hardware Specs

- Bluetooth UHF RFID Reader
