Since 1992 Colorflex has been an international innovator and provider of on-demand labeling and filing systems technology for computer generated, sequential, color and barcode label printing. In this "core business" Colorflex and its filing industry dealers have provided a major share of the file folder, labeling needs for healthcare, financial, manufacturing, insurance and banking markets, worldwide. Colorflex demand print software has also been used for integration with Physical Records Tracking and Information Management systems offered by major strategic partners.

Colorflex is dedicated to being the leading supplier of cost effective, advanced demand print solutions. We will be responsive to the needs of our customers with vigorous research and development, innovative products, quality support services, on-time delivery and aggressive continuous improvement.

For the future, Colorflex is well-positioned to continue expanding its presence internationally, and the reach of Colorflex software products into other markets and industries by "branding" its suite of software for other companies under contract software development and customization agreements. Colorflex will continue to pursue organic growth by capitalizing on its intellectual assets and establishing on-going global partnerships for other non-industry specific variable demand print applications.

Colorflex offers an array of label sizes and formats on high-quality face stock that can be used with its software. Whatever your labeling needs, Colorflex can provide the recommended face stock for inkjet or laser output printing applications. Learn more about our Colorflex solutions below:

Information That you need on your folder comes from your system.

Factory Printing

On-Demand Printing

Send your data files to our factory for printing on our high quality digital printers.

Watchdog automatically takes your information and routes it through the label printing software.

Printing is done in our factory on our dedicated digital printers, using your data and color calibrated machines.

Printing can be done with Intaglio standalone or networked software, or our web-based solution LabelsAnywhere.com.

Your colorcoded labels print out of your printer, using Colorflex's inkjet or laser label stock.

High-quality labels are sorted, packaged and shipped directly to you or your clients location for application to folders.

The Court seeks file folders and labeling, meeting the specifications contained within this RFQ and its attachments, for its 11 locations in the State of Florida….

Factory Labels

Colorflex is the premier provider of custom factory printed labels. Our labels are backed by a lifetime guarantee of performance. All labels are self-adhesive, ready to be applied. Factory printed labels come in a choice of standard gloss or optional matte finish.

All factory labels are packaged in sturdy cartons with chipboard protectors top and bottom or as separators.

Die Selections

Colorflex has an array of additional dies with various and unique label sizes/formats. If your requirements call for a custom label, one of these dies may provide the label size to fit the application, and enable avoidance of the cost and time of ordering a custom die.

Custom Labels

Colorflex is the premier provider of custom factory printed labels. Our labels are backed by a lifetime guarantee of performance. All labels are self-adhesive, ready to be applied. Factory printed labels come in a choice of standard gloss or optional matte finish.

Custom Label Sizes and Materials

Colorflex dealers have expanded into areas beyond the file room! We can offer you the following features:

- Customized blank face stock designs
- Custom design factory printed labels (can match current face stock in many cases)
- Custom materials to match the needs of outdoor, manufacturing, or presentation quality label needs

If You Think It......We Can Print It!
